

a Two information clocks enter the same comparison

b Crossed versions and the reported contrasts

	score A	score B	contrast
fit A	AA M(A;A)	AB M(A;B)	input substitution AB - AA
fit B	BA M(B;A)	BB M(B;B)	redevelopment BA - AA
			reported difference BB - AA

Each cell is fitted on one financial version and scored on another. The reported difference between two redeveloped pipelines is the sum of the two contrasts and the interaction, so it cannot identify which route dominates.

residual is the interaction term
